

TECHNICOLOR at PARAMOUNT

CREATING THE SOUND OF IMAGINATION

Greetings!

It is with great excitement and pride that we welcome you to Technicolor at Paramount. Our brand new post production sound facility was built from the ground up on one of the most iconic studio lots in the world. We have taken every measure to ensure that your professional and personal expectations will be exceeded. Creating a facility of this stature and quality required the dedication and commitment of many from both Technicolor and Paramount, and for that we are truly thankful.

As with all our Technicolor facilities, we pride ourselves on talent, innovation, quality, comfort and security. With numerous Oscar and Emmy wins and nominations to our talent's credit, our world-class facility measures up to their stature. Our commitment to provide our creative teams and clients with the latest technology doesn't stop with today. We pledge that this is just the beginning of a partnership with you in creating the best post production experience possible for film and television for years to come.

We look forward to sharing your creative experiences as you explore all we have to offer here at Technicolor at Paramount.

Welcome!

## FACILITY

Located on Avenue L in the center of the Paramount lot, the new Technicolor post sound facility is spread over three floors and 65,000 square feet. It has been meticulously designed with attention paid to every detail, choosing the right technology and keeping it consistent throughout. Optimum acoustics are available on the stages, as well as installing worldwide connectivity capabilities through the Technicolor Production Network (TPN). Our aim is simple: provide our customers the most comfortable and immersive work environment in Hollywood.

Technicolor at Paramount has been designed to be completely compatible from stage to stage, giving you the greatest flexibility in moving your project throughout our entire facility.

Consistent with all of our stages, the two flagship theatres feature Euphonix System 5 consoles with Eucon hybrid protocol. In addition, both stages are capable of mixing multiple sound formats, including IMAX. Each room is custom designed with six sound editorial work stations. Adjoining each stage are five editorial suites, private client lounges, a conference room and kitchen.

Technicolor at Paramount is fully compliant with MPAA security guidelines and includes eight high-tech mix stages; three ADR stages; one Foley stage; sound design and editorial suites; DVD audio and restoration rooms; three layback rooms and numerous client lounges and kitchens.

## TALENT

The heart of our facility is our tremendous team of creative professionals who are dedicated to bringing pictures to life with sound and pushing the envelope whenever possible. Our talent have collaborated with the top directors and producers in the theatrical and broadcast world and have been honored with a number of Academy Awards, Emmys, Cinema Audio Society Awards and MPSE Golden Reels.

## SERVICES

**Re-Recording Mixing** – 8 stages of various sizes to accommodate projects of every need with surrounding editing rooms and client lounges
